

Smart Retail for a Smarter World

Retail Made Effortless

Just tap, open the door, grab your items, and walk away. The system automatically detects which items have been taken and completes the payment. It's designed to offer a simple, unattended shopping experience in places like offices, apartments, schools, and other shared spaces.

Key Features

Smart Product Recognition

Advanced vision technology automatically identifies everything you take from the compartment. Even if you grab multiple items at once, the system ensures accuracy and smooth operation.

Touch-Free Payment

Supports QR code, Apple Pay, Google Pay, and standard cards — making checkout fast, safe, and completely hands-free.

Mobile & Web Management

Manage effortlessly your machine anytime through a mobile app or desktop portal — track performance, check goods, and system settings from wherever you are, anything via our Mobile App and Desktop Web Portal — anytime, anywhere.

Seamless Product Access

Once verified, you simply open the door and pick your items. It's a modern self-serve experience that feels like a personal mini-market with built-in loss prevention and added security.

Live Inventory Tracking

Every product movement is tracked in real time. Get accurate stock levels, usage trends, and restock alerts—all from a powerful backend that helps you run smarter.

Elevate your business with OUR Smart Stores

AI-Powered Computer Vision

Recognizes all products in the cloud.
Supports simultaneous multi-user
shopping with high accuracy.

Touchless Payment

Supports QR code payment, NFC
(Apple Pay, Google Pay), credit/debit
cards - safe and seamless.

Dual Operation Platforms

Manage everything via our Mobile
App and Desktop Web Portal
anytime, anywhere.

Open-Door Shopping Experience

Customers simply scan to unlock and
pick their items freely - just like
shopping at a grocery store.

Realtime Inventory Management

Track product movement, inventory
levels, and usage frequency via
powerful backend systems.

Ensure security

Advanced vision sensors and secure
payment systems prevent theft and
ensure peace of mind for your
business.

Smart Backend System

- Full control via Mobile and Desktop Dashboard
- Real-time visibility into orders video, customer behavior, and transaction flow
- Advanced SKU parameter management: categories, specifications, pricing, inventory, and restock alerts
- Live sales data, machine performance reports, and system diagnostics

Recommended Scenarios

- Office Buildings
- Hospitals & Clinics
- Universities & Dormitories
- Malls & Mixed-use Complexes
- Hotels & Lobbies
- Subway & Train Stations

Business Advantages

- Reduce labor costs by over 60%
- Operate 24/7
- Rapid ROI in high-frequency use cases
- Digitize your retail operation with ease

Specification	Specification
Model Number	579FXDETL
Storage Volume	18.01 cu ft
Dimensions	27.17 Inch x 27.56 Inch x 79.53 inch
Weight	lbs approx.
Temperature Range	33.8°F to 50°F
Cooling System	R600a
Rated Voltage	115V/60Hz
Placement	Indoor use
Interior Materials	Durable coated aluminum
Certification	ETL Certified
